

**Real adventures
on and off any path**

The ideal New Zealand motorhome takes you places others can't

Explorers are unique motorhomes for New Zealanders. They take the best of every motorhome ever built and discard the rest, leaving you a perfectly-formed kiwi adventure lifestyle machine.

The key to choosing your ideal motorhome really is size. It's easy to build big, but it's another to design a motorhome that does everything you need, yet remains a pleasure to use.

Explorers aren't too big, nor too small. These compact motorhomes are cleverly arranged with everything in a comfortable space that becomes the stage for the most spectacular shows that New Zealand nature can perform for you.

Explorers are as easy to drive and park as a car. And here's the best bit. They're made tough, right here in New Zealand by craftspeople who know more than a thing or two about motorhomes.

We only build the Explorer Navigator motorhome using one-piece fully moulded composite fibreglass bodies on the acclaimed Ford Ranger ute. Refined, yet tough, the four-wheel drive Ranger with the powerful 3L V6 Turbo Diesel will take you to places other motorhomers can only dream about.

NEW ZEALAND'S OWN PRODUCTION 4WD MOTORHOME

Go everywhere, in any season with confidence

RUGGED & DEPENDABLE

One-piece, fully moulded, seamless fibreglass body. Stronger, lighter and leak-free

COMPACT & EASY TO DRIVE

The perfect size to park and manoeuvre at just 6 metres in length

FULLY EQUIPPED

Four berths, galley, shower, basin and toilet all fully self-contained for touring off the grid

BUILT HERE WITH PRIDE

Built tough for New Zealand conditions. Full service and back up from Explorer Motorhomes

Explorer Navigator's compact and complete concept

Explorer created a new concept of hop in and go motorhomes as easy to use as a car – but also able to be driven through a stream, up a mountain or across broken ground.

The key to the Explorer's design success has been the overall compact size and clever use of space to accommodate everything needed for on and off-road touring. Explorers are built tough, waterproof and well insulated for local use. Many other motorhomes just don't cut it in our environment.

Your Explorer comes fitted with the must-have features that we know you need on tour. Navigator includes solar panels, lithium battery power, twin reversing cameras, diesel heater, tow bar, alloy wheels and cab running boards as standard.

Expertly designed and built here in New Zealand

For more than 20 years, every Explorer Navigator has been designed and manufactured in Auckland by a team that understand New Zealand conditions.

That's local expertise, trusted craftsmanship and reliable after-sales support for ownership confidence long after you drive away.

ONE-PIECE COMPOSITE BODY - LIGHTWEIGHT, STRONG & WATERTIGHT

Explorer's one-piece, fully-moulded composite fibreglass body is seamless, lightweight and exceptionally strong. With no joins or seams, it offers superior insulation, durability and long-term leak protection.

Compact living with true comfort

The perfect motorhome in a very clever package

Navigator offers you all-round comfort within a compact footprint. At just 6 metres long x 2.08 metres wide Navigator is just as easy to drive as a large saloon.

Navigator offers the very practical rear dinette and lounge area with generous space for lounging about with your favourite book and refreshments or sounds from Navigator's stereo system. Explorer's windows open fully outwards along with a large roof skylight allowing plenty of light and ventilation.

The exclusive feature of Navigator is the low entry to the lutan bed above the cab. This permanent bed is a class-leading queen size measuring 1.5m wide x 2.0m long for those who are a bit taller or enjoy a generous relaxing and sleeping space.

It takes just one step up to the large airy space with sitting headroom. Opening windows at each end of the lutan bed with built-in insect screens and blinds, offer good ventilation.

If you're accommodating four, there's another pull-out double bed for two in

the rear dinette. This cleverly concealed system is simple and easy to set-up and stow away. Two lap belts are included on the rear lounge seat.

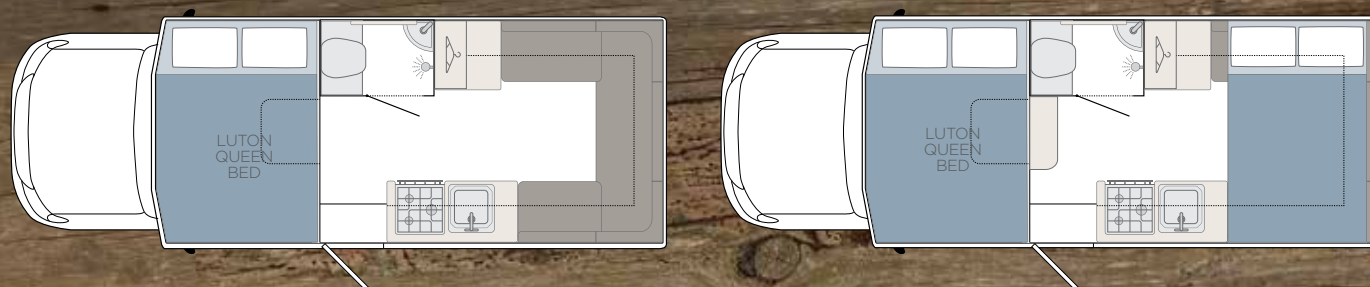

High quality lightweight plywood joinery with a blonded timber finish gives Navigator interiors a very stylish and hard wearing finish. There's ample storage in soft-close galley drawers, cupboards, wardrobe and under the side dinette seats.

Navigator has a well-specified galley kitchen with two extra pop-up benches and a pull-out pantry. With a gas oven and 3-burner gas hob you have everything you need to prepare any kind of meal even including oven roasts. It also features a large 130L fridge/freezer (12V/240V) which gives you absolute freedom to be off the grid for extended periods.

the main road*

Other features in the galley are a stainless steel sink with folding hot/cold tap and flush-mounting glass lid, pop-up bench extension, a slimline extractor range hood and generous storage to keep everything stored securely while you're underway.

The bathroom is easy-to-clean, fully moulded acrylic and is well ventilated with an opening roof skylight. The toilet is the latest electric flush, bench style Thetford C400 cassette system. There's also a corner basin with hot/cold single lever tap and extension shower hose on a slide rail. A mirrored vanity cabinet for additional storage and a useful pull-out drying rack are also included, along with the diesel heater outlet which creates a useful drying room when you need it.

Navigator has fresh water capacity of 90 litres and grey water capacity of 70 litres. Both tanks are fitted with monitors. All Explorer Navigator motorhomes are Certified Self Contained.

And outside, the Navigator rear boot locker provides more storage for everything you want to bring along like a BBQ, chairs and tools or your golf clubs, skis or fishing rods.

Explorer Navigator is fully equipped and ready for you to head off in any direction knowing that it just doesn't get any better.

Start your adventure today.

Ford Ranger is the best choice for the job

We only build Explorers on Ford Ranger XL utes; recognised as the best on the market for comfort, features and all-important 3L V6 Turbo Diesel power. You can even tow a trailer or boat up to 2000kg (braked).

BUILT TO HANDLE THE ROUGH

We completely upgrade the suspension and GVM (gross vehicle mass) to 3500kg, but otherwise, the Ranger is an extremely well specified ute with a stack of safety features for maximum stability and handling wherever you are. And that includes in water up to 500mm deep!

Redarc Rogue Battery Management System

Explorer Motorhomes proudly feature the REDARC Rogue and REDARC Manager Alpha50. Working together, these advanced systems intelligently manage your power by prioritising solar charging, delivering up to 50A of battery charging, and helping keep your start battery healthy. The result is reliable, efficient power wherever you travel, with easy monitoring and control of your motorhome's systems from a single screen.

TOP: Generous space in the lounge makes the best position for surrounding views

TOP RIGHT: Navigator's fully moulded bathroom

ABOVE RIGHT: Navigator's class-leading permanent queen-size luton bed is spacious, comfortable, well-ventilated, and very easy to access with one wide step

LEFT: Gas oven, 3-burner gas hob and a fridge/freezer complete the well-specified galley kitchen with two pop-up benches and a pull-out pantry
